Stamford, Conn., June 28.—More mystery was added to the puzzling circumstances that surround the death of Waldo R. Mr. Zeigler is the director of the St. Paul (Minn.) Art School, but has associations with this old church. The church is of solid stone, in pure Gothic. It stands on the banks of the Hudson, within a few hundred feet of the spot where Washington had his headquarters when he planned the battle of Yorktown, after which he removed to Newburgh, two miles distant.

The church was founded by Colonel Thomas Ellison in 1727, and is the mother of all the Episcopal churches in Orange County.

The archæologist found more than 2000 pieces of pottery decorated with 2ig-2ag lines of the so-called chevroa design. Mingled with these were found deer and bird bones and shells of fresh water mussels. The floor was covered with black soil, the remains of ancient charcosl fires.

In view of the fact that the place was so secluded, the presence of pottery and the bones and the lack of fint or arrow heads leads Mr. Schrabisch to believe that the cave was a "squaws" retreat" where the women hid while the braves were fighting with foes.

Wall, who is twenty-six years of age, was sent to the institution from the Rahway Reformatory on May 5, 1913. He had been arrested in Paterson for stealing from a Lackawanna freight car, and was sent to the reformatory on June 4, 1910. Owing to the crowded condition of the hospital, Wall was taken from his cell yesterday and quartered with twenty-five other supposedly harmless patients in a general ward.

The two men began a search for the missing convict, and finally discovered Wall crouching under the bed of another patient.
